Analysis

CUSTOMER NAME: MICOR CORP.

ag.

800 Clarmont Ave Bensalem, PA. 19020

Your sample file strips have been tested for archival quality (residual thiosafate concentration). They were tested according to the methylmon bive method described by the American Mational Standards Institute.

Concentrations of tees than (C) i.4 op (dicrograss) indicate archival quality, and greater them ()) i.4 op indicate non-writhval quality. The teet is only meaningful and accorate if performed so later than two weeks after processing. It is our understanding that we have received your file within the 2 week time-frame.

Actual test readings are provided below, as well as "pass/fail" check marks.

TEST IDENT.	ACTUAL CONCENTRATION	HEETS ANSI STANDARD (<) 1.4 mg	DOES NOT MEET ANSI STANDARD (>) 1.4 mg
MARRINGE BUREAU 1948 - 49	.14	/	

Archival quality, as sessored by residual thiosulists concentration, is defined in AMSI standard 115.1-AS: 'A photographic file composed and treated so that under archival storage conditions it is suitable for the preservation of records having parament value". This same Stundard sets the archival limit at i.4 mg for residual bibusing.

Methylene Blue Analysis

CUSTOMER NAME: MICOR CORP.

800 Clarmont Ave Bensalem, PA. 19020

Your sample file strips have been tested for archival quality (residual thiosulfate concentration). Hey were tested according to the methylene blue method described by the American Mational Standards Institute.

Concentrations of less than (C) 1.4 mg (elcrograms) indicate archival quality, and greater then ()) 1.4 mg indicate non-archival quality. The test is only emainiful and accurate if performed no later than two weeks after processing. It is our understanding that we have received your file within the 2 week tice-frame.

Actual test readings are provided below, as well as "pass/fail" check earks.

/	

Archival quality, as measured by residual thiosuifate concentration, is defined in AMSI standard 179.1-AS: "A photographic file composed and treated so that under archival storage conditions it is suitable for the preservation of records having perament value". This same Standard sets the archival limit at 1.4 mg for
